Do they miss me at home?-do they miss me? ould be an assurance most dear, (To know that my name was forgotten,)
As though I had never been there,

To know that the tailor and landlord, And the bank where my paper is due,

Do they miss me at home !-- do they miss me ? When the market for money is tight, And collectors in haste are pursuing Their debtors by day and by night?

Heave a sigh or a regret as they miss me?

And wish they could see me again.

Do they miss me at home?-do they miss me? When no longer I'm seen upon 'change, And do those who were wont to assist me, And wish they could see me again. To bear me to regions unknown, Look in vain for an occasion to dun me,

And wish I again were at home?

Other miss me at home!—do they miss me! Twould be an assurance most dear, To know that my name was forgotten, As though I se'er had been there. But I know that my memory lingers Around the dear spot as I roam, And as long as I've my wish and my creeper. They'll miss me, they'll miss me at home!

year, on account of a deficient supply penses in Utah during the present dis- Saviour."

once flowing with power for the miller with the song of the rushing waters. number of places manufactures have not decreased in our country, thanks to the power of steam. With a plentiful supply of fuel, steam forms a constant trusty power for driving machinery, and a steam factory can be erected independent of rare natural localities, like water falls. It has thus great advantages over water power. It requires one hundred and eighty thousand cubic feet fall, to produce the same effect in fifty cubic feet of water and three hundred pounds of coal by a steam engine.

While the power of water for manufaction was disagreed to—101 against 113.

Advices from all commercial centres of the continent, describe a stagnation of business and a general exercise of business and a general exercise of coal by a steam engine.

> HORSE POWERS AND SEPARATORS. P. D. BECKWITH,

HAS made a valuable improvement in Horse Powers, and is manufacturing the same at his Foundry, in Downgiac, Cass County, Mich. This Horse Power is designed for eight horses. It is Simple and Compact in its Construction And is so arranged that the working parts of its gearing perform their labor with one-half the heavy strain that is required in other Powers, and therefore being subject to one-half the wear and tear, and one-half the liability of breaking, both of which is very essential to every person connected with threshing.

The undersigned is also agent for R. T. MERRILL'S IMPROVED Double Milled Separator! This Separator drew the FIRST PREMIUM at the Michigan State Fair of 1857, and from the rep-ntation it has at home and abroad it recommends
